

# PKMag<sup>®</sup> 50

Portable Visual Inspection Device

## Advanced

- Portable inspection device with a high-definition camera and 5-inch LCD display
- Simple and intuitive push-button controls
- Inspect stationary objects in tight spaces
- Capture, save, and share images

## Accurate

- Magnification up to 14x
- Use the built-in LED lighting to view components or turn the LED lights off to reduce glare
- Adjustable handle makes it easy to inspect larger items and vertical surfaces

**Increase operator accuracy and improve productivity with FSInspection's cost-effective, ergonomic solutions.**

Magnify up to 14x

5-inch widescreen display

Built-in LED lighting

Capture, share, and save images

Long-lasting battery

**Advanced • Accurate • Affordable**

### High-definition Image Quality

Advanced technology offers crisp HD images at all magnification levels.

### Portability

Portable magnification to instantly inspect items from almost any angle without eyestrain, wherever the items are located.

### Inspection Versatility

A built-in stand provides hands-free use on a flat surface, while the two-position flip-out handle makes it easy to inspect larger items and vertical surfaces.

**Included:** Charger, USB to micro USB cable, wrist strap, and carrying case

### Store and Share Images

- Store up to 80 images directly on the device for easy communication and documentation
- Zoom in or out of images for examination of fine details
- Images can be stored as BMP files
- Connect PKMag to a computer through USB to save images on the computer for record keeping, collaboration, and email

### Specifications

#### Size

5.44 in x 3.45 in x 0.78 in / 13.8 cm x 8.8 cm x 2 cm

#### Magnification Range

2x to 14x

#### Storage

100 MB, .BMP format

#### Display

5-in / 12.7 cm LCD widescreen, 16:9 aspect ratio

#### Weight

10.5 oz / 300 g

#### Battery

Lithium-ion polymer battery  
3 hours continuous use  
Fully charged in 3 hours

#### Camera

5 megapixel auto-focus

#### Connection

Micro USB to USB
